

Lighting Enhancement Proposal

The attached visuals highlight the proposed installation area for Shine's premium architectural lighting system. As outlined by the red lines, the lighting will be seamlessly integrated along the perimeter of the building's roofline. This placement ensures elegant illumination that enhances the structure's architectural features while maintaining a clean, discreet appearance during the day.

Design and Installation

Our system installs seamlessly with no visible wires, blending into the building's exterior by day and delivering a striking, even glow by night that highlights the roofline and enhances architectural appeal.

Performance and Longevity

Built to last with a 100,000-hour lifespan—over 40 years of nightly use—our premium components ensure consistent, maintenance-free performance for decades.

Reliability and Protection

With an IP68 rating, our lights are dustproof, waterproof, and weather-resistant, engineered to perform reliably through all weather conditions.

Warranty and Support

We back our work with a 7-year full warranty covering parts and labor, plus a lifetime pro-rated warranty for long-term peace of mind.

Energy Efficiency

Each bulb uses less than one watt, adding only a few dollars to your monthly energy bill even with nightly operation.

Aesthetic Impact

Blends in by day and shines at night—our lighting system elevates your property's style while maintaining a clean, modern look.
