I apologize for the delay. Please see below for the Proposal Narrative:

"The Castle Rock Mobility Hub will serve as a key transportation node supporting seamless integration between multiple travel modes, including Bustang interregional bus service, personal vehicles, bicycles, pedestrians, and micro-mobility options. Proposed project elements include bus shelters, convenient access for buses to and from I-25, drop-off areas, and improved sidewalk and bicycle connectivity. COOT has short-listed three potential locations for the hub: Walker/Pine Canyon, Wolfensberger, and Plum Creek.

Mobility hubs represent a critical step toward improving transportation access, particularly for underserved populations such as seniors, youth, and individuals with disabilities. By creating a centralized location for regional transit and ridesharing, the project aims to reduce congestion, improve connectivity, and support sustainable growth along the I-25 corridor. In expanding regional transit options, COOT seeks to provide affordable, reliable, and accessible travel choices that enhance mobility for residents and visitors while better serving those who face the greatest transportation barriers."

Thank you,

Cora McNutt, PE (they/them)

Hi Cora,

Can you please send over a narrative describing the proposal(s)?

Thank you!
