

Thank you for the fast response. My neighbor at 986 and I are looking to acquire the red boxes in attached image. That area is not used, not maintained that well and we get a lot of people using that area for miscellaneous things that aren't great. We would love to acquire the non used area leaving access for city and fire department directly in the middle and possibly having you installing chain off poles in the center area stopping anyone using that area any more. I would just extend my fence to approved area. I'm sure there a lot of moving parts, but I figured we'd start here. Thank you for your time on this.
